Subject: RE: Prism Reference

"Through our relationship with Prism, The Blick Center was introduced to DCT Telecom Group. Our account manager was able to reduce our voice operating cost by over 40% a month by moving those services to DCT. Additionally, when we were pricing internet service for our datacenter, DCT was able to provide a solution that delivered greater bandwidth at a lower cost. The combined significant monthly savings will be spent on improving the infrastructure instead of simply maintaining it. This is key to remaining on the technological forefront in our industry."
